

SUMMARY OF STUDY

Low Impact Development (LID) Design Criteria for Stormwater Quality BMPs. 2009. AECOM. This document is a comparison of low impact development (LID) design criteria for various stormwater quality BMPs as a table summary. These BMPs may be found in handbooks/manuals published by six municipalities/agencies, including Bay Area Agencies Association, California Stormwater Quality Association, the County of San Diego, South Florida Water Management District, the City of Portland, and Prince George's County. These design criteria can be used as LID stormwater quality BMP design guidance for local engineers before a local LID design criteria handbook/manual is approved by local authority.
